Practitioner Training and Certification Program

## Integrating Information Technology (IT) into Your Teaching

### *Module Outcomes*

During this module, you will:

- Improve your skills with a piece of software that you might teach a learner to use
- Be exposed to a variety of software, hardware, and internet sites available to practitioners and learners
- Increase your confidence in using IT and integrate it into your work with learners
- Express yourself about your role in literacy
- Find out about literacy and literacy practitioners in other areas
- Practice 'marking for confidence' in a real situation
- Experience doing the kind of project or assignment you might do with learners
